New GE Course for Fall 2014

Geology 370: California Water

Tuesday & Thursday: 9:35 to 10:50 am (3 units lecture).
Satisfies new and old upper-division GE requirements.

Learn about: The natural and human processes that affect the supply and quality of our water resources in San Francisco and across California.

Topics include:

**Drought & climate change**

**Sierra snowpack**

**Best-management practices**

**Hydraulic fracturing “fracking”**
