Spring 2010  **Geology 270: Environmental Geology**

**Class meets:** Tuesday & Thursday 10:10 to 11:00 (2-unit lecture), and  
Wednesday 1:10 to 4:00 (1-unit lab)

**Course covers:** human interaction with the geologic environment, social and political implications, water and geologic resources, energy exploitation, land-use planning, waste disposal, and human modification of nature.

**Designed for:** non-geoscience (GE) and geoscience majors.

---

**Mt. St. Helens (1982)**  
2 years after eruption

---

**New Orleans (2005)**  
levee failures, Hurricane Katrina

---

**San Francisco earthquake probability**

---

**Bay Bridge (1989)**  
Loma Prieta earthquake

---
