**Prerequisite:** You must have passed **Chem 333 Organic Chemistry I** (or its equivalent) with a grade of a "C-" or better. If you have enrolled in this class and it is later detected that you do not have the prerequisites, you will be dropped automatically.

**Required Text:**                    "**Organic Chemistry, 5th Ed.**"                    (John McMurry; Brooks/Cole 2000)  
    "**Study Guide and Solutions Manual**"                    (Susan McMurry; Brooks/Cole 2000)

**Grading Policy:**                    **4 Exams** (100 points each) will be used to determine your grade out of a possible 400 points. There will be no cumulative Final Exam. **NO make-up exams will be given** nor will exams be tailored to your travel plans. Grades will be assigned according to the general scale shown below.

**Exam Grading Disputes:**        **On the back of your Exam**, write a detailed explanation supporting your answer to the Exam problem(s) in question. **Exam Grading Disputes are due the next class period after the day your graded exams were made available.** If you do not pick up your exams in class, graded exams will always be placed outside my office in the small filing cabinet.

**General Recommendation:** It is in your best interest to work on *all* the problems assigned in each chapter of the text. These will be posted on the course Web Site. Assigned problems will not be collected nor graded, however, some will appear as EXAM QUESTIONS in one form or another. The *best* way to learn Organic Chemistry is by working through problems.

**General Classroom Policy:** As a courtesy to your fellow colleagues, all **cell phones** and **paggers** should be **turned off** or **silenced** during class. Failure to do so will likely be seen as an invitation for cruel criticism from your colleagues while causing extreme embarrassment.
