3:45 Wrap Up

4:00 Exit

In the Internet age, publishing has become democratized. Many Iranians in different parts of the world have joined this movement and are expressing themselves through blogs and community websites. For Iranians living outside of Iran, blogs have helped build communities, creating a sense of Identity that surpasses borders.

This day-long event is bringing together bloggers and internet professionals of Northern California. This will be a chance to listen to them and learn about what they write.
