

**What did the instructor do especially well?**

- Lecture in simple ways; easy to understand.
- She was very informative and interesting as an instructor.
- Speak loud and clear.
- Explain the general idea.
- None.
- Explain the materials detailed. Assign helpful homework to us. Clear notes on board (visual aid).
- Lecture with good examples.
- Kim is very good in explaining the materials. That is essential to the course.
- Explains ideas clearly; examples are interesting.
- Clear definition.
- Very organized, express idea clearly!
- Kim brought a good attitude to her teaching.
- She is kind & welcomed questions.
- Expressing ideas.
- Gave great examples. Mentored students; made learning easy, understandable.
- Pace the course, cover all topics.
- She always came to class very prepared. She really made an effort to explain the complicated material in a simple way.
- Quirky humor + enthusiasm.
- Her class is really interesting with telling us related stories.
- She was able to clarify and explain the subject very well.
- She demonstrated concepts clearly.

**What can be done to improve the course and its instruction?**

- Provide more explanations on formulas.
- Better examples; write bigger on the white board with markers that work.
- Her examples.
- She needs to do lecture without looking from paper.
- None, very good. Overall, she is so good to teach everything.
- The homework assignments online were not good. Change the homework.
- Keep it the way now is fine.
- Explains more about comparison.
- Give more examples on how the theory works on questions.
- None!
- Get rid of Aplia.
- Homework it was way confusing at first & this affected my grade. Have homework due Sundays for whole week since the first week also be consistent, some folks were allowed to do missed homework but no others.
- Maybe more example questions show in class.

- In-depth of concepts and it's relate to our life situations.
- Think of better examples, read materials outside of the textbook.
- Needs to explain things more clearly, (a lot of people had to ask lots of questions for clarification); relied too much from the book.
- She is good enough.
- Stop with the quiz everyday because it can be stressful.

**What have been the most significant ideas, concepts, or skills that you have gained from this course?**

- How to use theories into concepts of real world.
- A thorough grounding in introductory economic ideally + tools.
- Mostly curves & graphs of certain economic trends/ ideas.
- Monopoly impact on market.
- Analysis skills.
- All kinds of models, formulas to calculate the elasticity of stuffs and the game theory.
- How to shift a change in a graph.
- Economy supply & demand.
- Knowledge about econ 101; the relationship between demander and supplier! It's very helpful for doing business.
- Supply & demand.
- A good teacher is half done! Strongly recommend this teacher!
- Market Para, supply and demand.
- Supply and demand curves. I can look at them & understand them.
- Nothing.
- Think positively about the economic situation now.
- Supply + demand. And everything that we learned in class!
- The 10 principles of micro econ.
